

Instructions for arranging digital printing on sheet format

General information:

A template for illustrator is available for dividing your design on a plate format. You can download these under the button downloads on www.repos.nl
Duralgraphics_Template_1000x1000.ait

Dimensions en margins

- The production takes place on sheets of 1m², the workable part is 960x960mm
- The margins are therefore 20 mm around
- The mutual spacing of the products is 5mm

Crop marks, holes and rounded corners:

- Do not apply crop marks, these will not be used
- Consider holes as cutting lines, so also with the spot color 'cut contour' or 'cutting lines'
- Do not fill holes, this part is not printed and can provide a white edge.
